Re: BLM Programmatic EIS for Herbicide Vegetation Treatments in 17 Western States

Mr. Brian Amme, Project Manager
Bureau of Land Management
P.O. Box 12000
Reno, NV 89520-0006

Dear Mr. Amme:

- 1 I am a physician with an interest in Environmental Medicine and Chemical Sensitivity.
- 2 I object to the massive herbicide application in 17 Western States currently being planned by the Bureau of Land Management - the planned spraying of 932,000 acres with herbicides. This massive spraying will put chemicals into air, soil, ground water and the food supply, including the organic food supply, and will drift to other states.
- 3 These chemicals are not safe. Pregnant women and unborn children are particularly at risk. There is no good safety data on these products.
- 4 The best Alternative is Alternative C - no more applications of herbicides.
- 5 I would appreciate it if you would put me on the mailing list for the Vegetation EIS Update newsletter.

Sincerely yours,

Patricia Issarescu, M.D.
